-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 November 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-110 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 and 39-110 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23, 39, 40-63, 64-110 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuzuhara (IDS cited reference 2002136332) in view of Simpson (U. S. Pat. # 1,686,936).

With regard to claims 1, 2, 4-6, 11-17, 39, 40, 42, 44, 49-55, 62, 63, 65, 70-77, 84-86, 91-106, Yuzuhara discloses a single piece applicator nozzle (8) comprising attachment portion (at 62) configured to attached the nozzle to a receptacle (4) containing a product, an arrangement of a plurality of teeth (102) disposed in at least one row (see fig. 1) comprising first and second end teeth (102b, 102c), at least one of the teeth (102b, 102c) defining a channel (114) being configured to be placed in flow communication with product contained in the receptacle, the channel opening on an exterior of the at least one tooth (at 116, fig. 4). Yuzuhara also discloses the end teeth (102a, fig. 3) being solid devoid of outlet apertures. Yuzuhara further discloses the channel opening on an external lateral surface of at least one tooth via at least one outlet aperture (116) facing in a direction of at least one adjacent tooth (see fig. 4).

Yuzuhara fails to show the outlet aperture opens into a groove which has a first end into which the at least one outlet aperture opens and a second end located substantially at a free extremity of the at least one tooth; the arrangement being formed by a single molded piece. Simpson discloses an applicator nozzle device (2) comprising an arrangement of teeth (18), at least one of the teeth defining a channel (17, fig. 2) in flow communication with product, the channel opening on an exterior of the at least one tooth via at least one outlet aperture (19), wherein the outlet aperture opens into a groove (the acute edge 20 in the middle part of each tooth) which has a first end into which the at least one outlet aperture opens and a second end located substantially at a free extremity of the at least one tooth (see figs. 1, 2). Simpson further discloses the arrangement being made of a single molded piece (page 2, lines 35-42). It would have been obvious to one having an ordinary skill in the art at the time the invention was made to construct the tooth with the outlet aperture opens to the free extremity of the tooth and the groove configuration as taught by Simpson into the hollow tooth of Yuzuhara in order to provide maximum strength and ability to penetrate hair of the user. Yuzuhara in view of Simpson discloses the arrangement being configured so as to present an obstacle to product flowing from at least one outlet aperture beyond the first and second end teeth. In regard to claims 9-10, 18-22, 47-48, 56-60, 68-69, 78-82, 87-90 and 107-110, Yuzuhara shows the attachment portion comprising screw threading configured to engage with screw threading on a neck (at 42, 44, fig. 3) of the receptacle and the product contained within the receptacle being a hair product. In regard to claims 23, 61, 83, it would have been obvious to one having an ordinary skill in the art at the

time the invention was made to construct a deformable material for the receptacle, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. In regard to claims 3, 7-8, 41, 45-46, 64, 66-67, Yuzuhara in view of Simpson further show the channel opening on the exterior of the at least one tooth via two outlet apertures (at 116 on both sides of each tooth, fig. 4, Yuzuhara) facing in opposite directions.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robyn Doan whose telephone number is (571) 272-4711. The examiner can normally be reached on Mon-Fri 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
